

Alfresco Blinds

Proud Stockist of

Alfresco blinds, also known as side-winder strap down awnings, provide brilliant protection against changeable weather conditions. They are operated with a gearbox/crank system or fully automated and are perfect for verandas, patios and pergolas.

Features & Benefits:

- UV protection
- Can be held down by dock clips or straps
- Available in range of colours, made from a choice of canvas or UV stable PVC in clear or tinted
- Keeps out unwanted rain/wind while retaining views
- Simple to roll up when not in use
- Joining zippers allows you to zip other patio blinds together for larger spaces
- Heavy duty tracks

Heavy-duty Extrusion Profiles

Heavier weight Aluminium extrusion profiles for robust flex strength, superior to most alternative track blind systems.

Patented Multi-directional Channel

Unique patented multi-directional tension adjusting side channel to optimize blind alignment and smooth rolling motion

Concealed Retention System

A floating side channel design to fully conceal the side retention system and protect it from the elements

Unique Zip Design

Self-lubricating polymer zip design for lay-flat blind rolling that eliminates fabric distortion and skewing of the blinds in operation

Slim Look Design

135mm square headbox design with extruded aluminium options, ideally suited to current slim and sleek design trends

Motorisation Options

3 operation systems with interchangeable components for crank, spring and motorized options.
